## SELF-DIRECTED SCHOOL

### Learning Happens Everywhere

*Self-directed education* refers to the educational approach of young people and those supporting them to take charge of their education through self-chosen activities and life experiences. Education is the sum of everything we learn to live happy, meaningful lives at our center.

## HYBRID HOMESCHOOLING

### The Future of Education

Hybrid homeschooling is a model where children split their time between their home and a prepared learning environment with trained facilitators. This could be three days at home and two days at school or vice versa, resulting in a progressive Educational Ecosystem for Families.

## SPANISH IMMERSION

### Bilingual Learning Community

A bilingual learning environment provides children with invaluable cognitive benefits and a unique perspective of cultures other than their own. Spanish exposure that forms part of our model allows for the more natural acquisition and facilitates practicality.
